Notes: 1. "Percentage of violations" means the percentage of workplaces which committed violations in the total workplaces receiving regular inspections.

2. Years indicate calendar years, except 1965 which is a fiscal year.

3. "No. of applicable workplaces" and "no. of workers" after 1980 are based on the Establishment and Enterprise Census (Statistics Bureau, MIC).

For the years when survey was not conducted, the figures of the previous year were adopted.
